**EXERCISE: 2**

COFFEE ORDERING SYSTEM

AIM:

To design and implement a Use Case Diagram for a Coffee Ordering System using Umbrello UML Modeller.

PROCEDURE:

1. Open Umbrello UML Modeller and create a new project named Coffee Ordering System.
2. Add actors using the Actor tool
3. Create use cases using the Use Case tool.
4. Draw associations by connecting actors to their respective use cases with relationship lines.
5. Define relationships using "Include" for dependent actions.
6. Arrange the diagram properly for clarity, ensuring all connections are visible and structured neatly.
7. Save the project and export the Use Case Diagram as an image or PDF for documentation.

DIAGRAM:

USECASE DIAGRAM

RESULT:

A Use Case Diagram for the Coffee Ordering System was successfully designed and implemented using Umbrello UML Modeller.
